- **AIA**
  2022 - Present
- **Standard Chartered**
  2019 - 2022
- **HSBC**
  2016 - 2019

CAREER FOCUS

Finance roles spanning banking and insurance, with an emphasis on disciplined analysis, clear reporting and practical decision support.

LOCATION

Central, Hong Kong

PROFESSIONAL PROFILE

Finance professional with experience across banking and insurance. Combines financial analysis and risk modeling with practical Excel and SQL work. Brings a structured approach to management reporting, stakeholder coordination and the review of assumptions behind business decisions.

PROFESSIONAL EXPERIENCE

Manager | AIA

2022 - Present

- Coordinate finance workstreams and align analytical deliverables with stakeholder priorities and review schedules.
- Prepare financial analysis and reporting materials that make assumptions, movements and open questions easy to review.
- Use Excel and SQL to organise supporting data, reconcile inputs and maintain traceable working papers.
- Support risk-modeling discussions by explaining scenario assumptions, limitations and implications for decisions.

Analyst | Standard Chartered

2019 - 2022

- Analysed finance data and translated findings into concise reports for business stakeholders.
- Maintained Excel working files and SQL checks to support consistent reporting and investigation of differences.
- Prepared management-review materials with clear definitions, reconciliations and supporting notes.
- Worked with colleagues to clarify data questions and communicate analytical conclusions in a practical form.

Kelly Tsang

PROFESSIONAL EXPERIENCE & SELECTED WORK

Analyst | HSBC

2016 - 2019

- Analysed finance data and prepared recurring reports to support business decisions.
- Built Excel working papers with clear reconciliations and review notes for stakeholders.
- Supported SQL-based checks to compare source data with reporting outputs and investigate differences.
- Documented assumptions and calculations so colleagues could review analytical conclusions.

SELECTED WORK THEMES

01 | Financial analysis and management reporting

Bring financial inputs into a consistent view, explain significant movements and prepare decision-focused reporting. Emphasise clear definitions, traceable calculations and a concise account of what changed and why it matters.

02 | Risk modeling and review discipline

Organise assumptions and scenario comparisons so reviewers can understand the drivers of an outcome. Present limitations alongside conclusions and keep supporting work clear enough for another colleague to follow.

03 | Stakeholder communication and delivery

Translate an analytical question into a practical work plan, coordinate review points and communicate findings with the supporting evidence. Keep open questions visible and distinguish observed results from assumptions.

WORKING APPROACH

Structure

Clarify the question and the decision the analysis should support.

Review

Check inputs, reconcile differences and make assumptions explicit.

Communicate

Summarise findings clearly and keep unresolved questions visible.
